

CMPDI DETAILED PROJECT REPORT (DPR) - Chirimiri Underground SECL

Subsidiary: SECL | Capacity: 3.2 MT | Geological Basin: Chirimiri Coalfield, Chhattisgarh

Official Publication | Published by Ministry of Coal & CMPDI Ranchi | Date: 11 September 2026

This Detailed Project Report (DPR) formulates the mine planning, equipment sizing, and geological stripping layout for Chirimiri Underground SECL under SECL.

Geological Reserve & Setting: Situated in the Chirimiri Coalfield, Chhattisgarh, the mine exploits thick coal seams belonging to the Barakar Formation. Total geological reserves are estimated at 480 Million Tonnes.

Rated Production Capacity: 3.2 MT under mechanized Underground operations. Stripping ratio is projected at Continuous Miner, utilizing 42 m3 electric rope shovels, 240T rear dump trucks, and high-capacity bucket wheel systems.

Environmental Mitigation & FMC: Coal evacuation is planned via a First Mile Connectivity (FMC) rapid loading silo with in-pit crushing and a 4.2 km overland conveyor to eliminate surface haul truck emissions.

Technical Parameter	Project Specification	DGMS / Ministry Compliance
Subsidiary / Mine Name	SECL - Chirimiri_Undergroun	Approved by CIL Board
Rated Annual Capacity	3.2 MT	Environmental Clearance Granted
Mining Method	Underground	High-wall Stability Factor > 1.3
Stripping Ratio	Continuous Miner	Continuous Reclamation Mandated
Evacuation Mode	Rapid Loading Silo / FMC	Zero Surface Dust Spillage
