

CMPDI DETAILED PROJECT REPORT (DPR) - Khadia Opencast 16MTY

Subsidiary: NCL | Capacity: 16.0 MT | Geological Basin: Singrauli Coalfield, UP

Official Publication | Published by Ministry of Coal & CMPDI Ranchi | Date: 11 September 2026

This Detailed Project Report (DPR) formulates the mine planning, equipment sizing, and geological stripping layout for Khadia Opencast 16MTY under NCL.

Geological Reserve & Setting: Situated in the Singrauli Coalfield, UP, the mine exploits thick coal seams belonging to the Barakar Formation. Total geological reserves are estimated at 480 Million Tonnes.

Rated Production Capacity: 16.0 MT under mechanized Opencast operations. Stripping ratio is projected at 3.60 m3/t, utilizing 42 m3 electric rope shovels, 240T rear dump trucks, and high-capacity bucket wheel systems.

Environmental Mitigation & FMC: Coal evacuation is planned via a First Mile Connectivity (FMC) rapid loading silo with in-pit crushing and a 4.2 km overland conveyor to eliminate surface haul truck emissions.

Technical Parameter	Project Specification	DGMS / Ministry Compliance
Subsidiary / Mine Name	NCL - Khadia_Opencast_16MT	Approved by CIL Board
Rated Annual Capacity	16.0 MT	Environmental Clearance Granted
Mining Method	Opencast	High-wall Stability Factor > 1.3
Stripping Ratio	3.60 m3/t	Continuous Reclamation Mandated
Evacuation Mode	Rapid Loading Silo / FMC	Zero Surface Dust Spillage
