

# CMPDI DETAILED PROJECT REPORT (DPR) - Madhuband Washery Modernization

**Subsidiary: BCCL | Capacity: 5.0 MT | Geological Basin: Jharia Coalfield, Jharkhand**

Official Publication | Published by Ministry of Coal & CMPDI Ranchi | Date: 11 September 2026

This Detailed Project Report (DPR) formulates the mine planning, equipment sizing, and geological stripping layout for Madhuband Washery Modernization under BCCL.

Geological Reserve & Setting: Situated in the Jharia Coalfield, Jharkhand, the mine exploits thick coal seams belonging to the Barakar Formation. Total geological reserves are estimated at 480 Million Tonnes.

Rated Production Capacity: 5.0 MT under mechanized Washery operations. Stripping ratio is projected at 18.0% Ash Coking Coal, utilizing 42 m3 electric rope shovels, 240T rear dump trucks, and high-capacity bucket wheel systems.

Environmental Mitigation & FMC: Coal evacuation is planned via a First Mile Connectivity (FMC) rapid loading silo with in-pit crushing and a 4.2 km overland conveyor to eliminate surface haul truck emissions.

| Technical Parameter    | Project Specification       | DGMS / Ministry Compliance       |
|------------------------|-----------------------------|----------------------------------|
| Subsidiary / Mine Name | BCCL - Madhuband_Washery_Mo | Approved by CIL Board            |
| Rated Annual Capacity  | 5.0 MT                      | Environmental Clearance Granted  |
| Mining Method          | Washery                     | High-wall Stability Factor > 1.3 |
| Stripping Ratio        | 18.0% Ash Coking Coal       | Continuous Reclamation Mandated  |
| Evacuation Mode        | Rapid Loading Silo / FMC    | Zero Surface Dust Spillage       |
