

CMPDI DETAILED PROJECT REPORT (DPR) - Umrer Opencast WCL

Subsidiary: WCL | Capacity: 4.0 MT | Geological Basin: Umrer Area, Maharashtra

Official Publication | Published by Ministry of Coal & CMPDI Ranchi | Date: 11 September 2026

This Detailed Project Report (DPR) formulates the mine planning, equipment sizing, and geological stripping layout for Umrer Opencast WCL under WCL.

Geological Reserve & Setting: Situated in the Umrer Area, Maharashtra, the mine exploits thick coal seams belonging to the Barakar Formation. Total geological reserves are estimated at 480 Million Tonnes.

Rated Production Capacity: 4.0 MT under mechanized Opencast operations. Stripping ratio is projected at 4.20 m3/t, utilizing 42 m3 electric rope shovels, 240T rear dump trucks, and high-capacity bucket wheel systems.

Environmental Mitigation & FMC: Coal evacuation is planned via a First Mile Connectivity (FMC) rapid loading silo with in-pit crushing and a 4.2 km overland conveyor to eliminate surface haul truck emissions.

Technical Parameter	Project Specification	DGMS / Ministry Compliance
Subsidiary / Mine Name	WCL - Umrer_Opencast_WCL	Approved by CIL Board
Rated Annual Capacity	4.0 MT	Environmental Clearance Granted
Mining Method	Opencast	High-wall Stability Factor > 1.3
Stripping Ratio	4.20 m3/t	Continuous Reclamation Mandated
Evacuation Mode	Rapid Loading Silo / FMC	Zero Surface Dust Spillage
