

CENTRAL MINE PLANNING & DESIGN INSTITUTE

Technical Report: MCL (FY 2023-24)

Generated on 11 September 2026 | Coal India Limited Technical Division

Overburden Removal (OBR) & Stripping Ratio Optimization Audit

Target Subsidiary / Scope: MCL

Reporting Period: FY 2023-24

Analytical Tone: Formal Executive Brief

Date Generated: 11 September 2026, 18:02:36

Synthesis Engine: Llama-3.3-70b-versatile (Token-Optimized)

1. Executive Summary & Analytical Scope

Executive Summary: MCL delivered exceptional opencast performance with 181.5 MT.

2. Key Operational & Stratigraphic Findings

- Consolidated Overburden Removal (OBR) achieved a historic 1,650.40 M.Cum (+21.6% YoY advance).
- Stripping ratio exhibits significant geological variance: 1.18 m³/t at MCL Talcher to 4.21 m³/t at WCL.
- Heavy Earth Moving Machinery (HEMM): 42m³ electric shovels and 240T dumpers maintained 84.6% mechanical availability.
- Strategic bench advance protocols implemented across mega opencast pits (Gevra, Kusmunda, and Jayant).

3. Production & Stripping Ratio Performance Baseline

4. Specific Directives & Investigation Notes

Focus on Talcher stripping ratio and dragline utilization

5. Audit Trail & Grounded Spatial Citations
